We are Preventative Surveillance

We are in the business of preventing criminal activity before it occurs.

Using the latest technologies in surveillance, this is possible.

The camera is alerted at the moment of suspicion, then sends data to our monitoring center where we intervene live via speakers on site.
We are Wireless Access

Live surveillance cameras at the access of your fingertips.

With our software programs you are able to view your cameras from any android or iPhone. Any computer or tablet can also be used to view footage; all you need is the internet.

If there is an active incident on your property and you are out of town on business with just a click, you are able to witness what is happening.
Analytics at Work

Reduce your potential liability with analytics and monitoring.

• Graffiti Detection
• Object Classification: People differentiated from cars, animals, and other objects.
• Crowd Formation
• Line Crossing
• Object Left Behind or Missing
• Direction of Travel
• Dwell Time Alarm
• Loitering
• Access Control
• Employee Escorts

Note: These are a few examples of how camera analytics can work for you.
Monitoring Center

- Audio talk-down at the moment of suspicion
- Click/Send video research
- Email-able alerts
- 24/7 monitoring over your assets
- Immediate police dispatch before a crime can occur
We are Affordable

Leasing and financing options are available for all surveillance equipment. No need for up front capitalization. Therefore, we are able to accommodate most any budget, large or small.

Monitoring and Maintenance plans are competitively priced as well, for your region.

Between ourselves and our service partners, we have eliminated up-front costs so you can afford a state-of-the-art surveillance program today, without breaking the bank.
